

# Mississippi State Remote Cardiovascular Monitoring Study

Volunteer for research at MSU and contribute to discoveries that may improve health care for you, your family, and your community!

**Age:** Over 18 years

**Gender:** Any

**Health Condition:** Healthy or with a history of cardiovascular issues

## Description

This study aims to establish a method for remotely and non-invasively collecting cardiovascular signals. The goal is to demonstrate that it's feasible to gather these health indicators without the need for participants to be physically present in a healthcare setting.

## This study requires

A smartphone (iPhone or Android), 5 minutes of your time, and filling a questionnaire

## Who can participate

Adults who can read and understand the informed consent form which can be found on this page and is in English language.

## Schedule

Recruitment period  
From May 1, 2024

## Location

Remote
